

FORKDISP 12 Pc. Fork Display

Enclosed pieces:

Below are instructions for easy set-up of the Little Giant® DuraFork Display:

1. It is best to assemble this display in the location where it will be standing in the store, as it will be more difficult to move once it is full of forks.
2. Unfold the large base, with notched corners up, as shown in photo **A**. This is actually upside down, but the edges need to be folded (as shown in photo **B**) before the base can be placed right side up on the floor.
3. Flip display right side up so the folded edges are on the floor.
4. Place two long partitions in the bottom of the display as shown in photo **C**, with the notched edges facing up.
5. Place two short partitions inside base, perpendicular to the long partitions, matching notches (shown in photo **D**). Be sure the partitions fit snugly together.
6. Fold all four edges of one of the fork holders as shown in photo **E**
7. Keeping edges folded, place in display and rest on the long and short partitions with white side facing up, as shown in photos **F** and **G**. It should fit securely on top of the connected partitions below.
8. Repeat steps 4-7 for the second layer, as shown in photos **H**, **I** and **J**.
9. Fold down the top edges of the base so they fit into the slots on the fork holder piece, as shown in photos **K** and **L**.
10. Fill with Little Giant® DuraForks as shown in Photo **M**!

The finished display!

- Display shown in these assembly instructions is plain white. Actual display has artwork as shown in photo **M**.
- Display holds up to 12 DuraForks, sold separately.
